Curlers Thinking Of Coming Season

The annual meeting of the Didsbury Curling Club will be held in the C.P.R. waiting room next Tuesday night. Curlers who have not paid their dues are requested to pay the secretary immediately as books will be closed off for audit Saturday, October 22nd.

Junior Board of Trade Activities.

Farewell Presentation To Ralph Hansen.

A number of members of the Junior Board of Trade met at the school on Friday evening to make a farewell presentation to Mr. Ralph Hansen, who had been transferred from the local creamery to Lethbridge.

Mr. Hansen, during his stay here, had been very interested in all the young people's activities and was one of the leaders in organizing the Junior Board of Trade.

Mr. Ed Ford made the presentation of a fountain pen and pencil set on behalf of the Junior Board of Trade and thanked him for the efforts he had made in the interests of the organization.

Mr. Tom Royds on behalf of the Tennis Club also expressed regret on his leaving the district and wished him success in his future home.

BIRTHS

On Monday, October 17th, to Mr. and Mrs. Lyle Munro a daughter, Deanna Jeanne.

SALE OF Ladies' Coats..

One Week Only Saturday, Oct. 22 to October 29

Mountain View Passes Hospital By-Law

The Didsbury and Olds Hospital by-laws were passed for the third and final reading at the last meeting of the Mountain View Council held at Olds. The first and second readings were given on May 7th and the posting of notices and the necessary advertising has been done. There being no objections by the electors, the council proceeded to give the by-laws their third reading.

The by-laws empower the council enter into an agreement with the towns of Didsbury and Olds and the municipality of Westerdale, to build and equip hospitals at each of the towns.

The council made a review of the application for direct relief, and several who had been on relief for some time were taken off relief. The secretary reported that the sum of \$209.50 had been paid for relief during September.

A communication was read from the Department, stating that the placing of single unemployed on farms would be continued for the coming winter. However, \$5.00 a month would only be paid to farmers taking applicants from the relief rolls of Calgary, Edmonton, Lethbridge or Drumheller.

A number of applications to have payments suspended in connection with the Seed Grain Relief came under review. The council decided that in all cases where there was a reasonable crop they would insist that the seed grain loans should be paid in full.

The council decided that in conjunction with the provincial government they would continue the grass seed and forage crop plan for next spring. Under this plan farmers may receive a limited quantity of grass seed for spring sowing at one half the cost. Applications should be made as early as possible, as approximately only 40 farmers can be taken in under this scheme.

It was reported that the road work had been completed for the season and that the machinery had been laid up.

A claim for damage to a truck was presented. It was claimed that the truck had received damages when it broke through a small bridge on a road southeast of Didsbury. The claim, however, was disallowed.

Two new applications under the Farmers' Credit Arrangement Act were reported and several applications for tax consolidation were approved. An application for mothers' allowance was also approved.

Knox United Church Notes.

The minister will have charge of all services next Sunday, Oct. 23rd, and his sermon topic will be "The Golden Rule or the Rule of Gold." A cordial invitation is extended to all.

An organization meeting of the Young People's Society was held on Monday night, when the following officers were elected:

President, Don Phillipson
Vice-President, Betty Boorman
Secretary, Harold Burns
Treasurer, Barbara Spence

Agricultural Society Annual Meeting

The annual meeting of the Didsbury Agricultural Society was held Tuesday afternoon with Mr. F. W. Leeson, president, in the chair.

The secretary's report was read and showed that the fair was more successful this year than for several years. The entries had been increased in every department, there being 797 entries made by 130 exhibitors, an increase of about 200. The number of livestock exhibitors had been 267.

The financial statement was read and showed that approximately \$300 was available to be paid out in prize money. It was decided that 33 1/3 per cent of the prize money stated in the prize list be paid out.

The meeting recommended to the directors that a fair be held next year and that the prize list be revised and a set amount of prize money be offered.

It was also recommended that the directors co-operate with the sports committee in having the race track moved west of its present location and if possible make a full half-mile track.

The following officers were elected:

President, F. W. Leeson
Vice-President, H. Brennan
Secretary, C. E. Reiber
Auditor, A. C. Fisher
Directors:

I. L. Klein	W. M. Thurlow
N. S. Clarke	W. E. Rieder
S. L. Bosomworth	J. E. Gooder
R. A. Gulliver	H. Hansen
J. Francis	Tom Morris
J. E. Liesmer	E. G. Ranton
Jas. Sheils	J. V. Berscht
Carlton Leeson	Reid Clarke
W. Morton	C. D. Casey
D. G. Hardbattle	George Burns
S. O'Brien	C. F. Rennie

Jack Robertson

J. V. Berscht was elected representative to the Alberta Fairs Association.

Thanks!

The local W.C.T.U. of Didsbury wish to take this opportunity of thanking all the friends who so kindly opened their homes to receive and entertain the delegates of the recent provincial convention.

They also wish to extend hearty thanks to all who contributed to the programs during the various sessions of the convention.

WEDDINGS

PERRIN—CHALMERS

St. Barnabas' Church, Calgary, was the scene of a quiet ceremony on Thanksgiving Day when Elizabeth Winifred, daughter of Mr. and Mrs. Alfred Chalmers of Calgary, became the bride of Mr. Albert Maitland Perrin of Didsbury. Rev. J. M. Roe officiated.

The bride was given in marriage by her father and was attended by her sister, Miss Mavis Chalmers, as bridesmaid. Mr. Thomas Lincoln of Calgary was groomsman. Only immediate relatives and friends were present.

Following a wedding luncheon at the Mandarin Gardens, the bride and groom left for their home at Westcott.

Crystal Dairy Winnings

The Crystal Dairy have again been successful in taking a full quota of prizes at the various agricultural exhibitions across Canada.

The following prizes have been awarded them: At Calgary one 2nd; Brandon one 2nd; Vancouver two 3rds; London two 2nd; Canadian National at Toronto two 2nd and one 3rd.

They did not exhibit at Edmonton, Saskatoon or Regina but they have a prize or two for every exhibition they entered.

We are pleased to report that the farmers of the Didsbury district can produce a product equal to any in the Dominion and Didsbury butter is holding its own with most of the Creameries throughout Canada today.

Have You Registered?

Tenants and relatives have less than two weeks left in which to register if they wish to take part in the municipal elections next February.

Because you registered last year is no reason why you should not register this year. The "Town Act" requires that relatives and tenants register each year during September and October. If you have not registered, do it now!

NOTICE

To Relatives of Persons on the Assessment Roll and to Tenants.

Notice is hereby given that during the months of September and October, applications may be made under the provisions of Section 188 of the Town and Village Act for inclusion in the voters' list of the Town of Didsbury by the following persons, namely:

The wife, husband, father and mother and every son and daughter of any person whose name appears upon the assessment roll who are entitled to be placed upon the said list:

(a) if he or she is resident within the town or assists him in a business in respect of which he is taxable; and

(b) if he or she is of the full age of twenty-one years; and

(c) if his or her name does not already appear on the roll; and

tenants who have rented an assessed parcel for a period of twelve months immediately preceding the last day of August of this year; and the wife, husband, father and mother and every son and daughter of tenants who have made application as aforesaid.

W. A. Austin,
Secretary-Treasurer.

W.C.T.U. Convention.

Mrs. James McArthur, of Edmonton, was elected president of the provincial W.C.T.U. at the convention which was continued last Thursday. Other officers elected were: Mrs. Elizabeth Stewart of Parkland, vice-president; Mrs. R. S. Martin, Edmonton, corresponding secretary; Mrs. McPherson, Islay, recording secretary; Mrs. E. M. Baillie, Calgary, treasurer; Mrs. Colby Carr, Okotoks, "Y" secretary, and Mrs. J. Pattullo, of Edmonton, L.T.L. secretary.

Annual presentation of banners saw Calgary West End Union awarded the banner for gaining the most members in the year, while Calgary district also won. The Little White Ribboners banner was awarded to South Edmonton band.

Twin baby boys of Mr. and Mrs. A. S. Gole, Didsbury, were dedicated and made Little White Ribboners, the ceremony being conducted by Mrs. McElroy of Calgary.

At the Friday sessions resolutions were the order of the day. One resolution asks that provincial government when dealing with drunken drivers arrange that one or more of five well-known tests be applied to ascertain if the driver is under the influence of liquor.

Taking the stand that modern science recognizes alcohol as poisonous narcotic, the convention resolved "That the Federal government be requested to place alcohol on the list of narcotic drugs, where it rightfully belongs."

Jury Returns

Open Verdict

An open verdict was brought in at the inquest held on Wednesday afternoon into the death of Ronald MacDonald, who was found fatally injured on the blind line west of town on the night of October 10th. There was no evidence produced as to how the accident had happened. Walter Notley gave evidence as to finding the injured man, and Tom Pearson was the only witness who saw the man on the road, stating that he saw MacDonald walking on the road about a half mile east of where the man was found.

"One Take Temple"

Even under the critical eye of director John Ford, Shirley Temple retains her title of "One Take Temple." Ford, winner of the annual award of the Academy of Motion Picture Arts and Sciences, directed by the nation's No. 1 boxoffice star in Rudyard Kipling's "Wee Willie Winkie," a spectacular Twentieth Century-Fox production appearing at the Opera House this Friday and Saturday, and found that Shirley justly deserves the cognomen she gained in previous films for her ability to render a scene correctly the first time it is filmed.

Another Dragon To Slay

It would be difficult to conceive of a more worthy movement of an humanitarian character than the drive which is now being launched across the Dominion to make a co-ordinated and well directed attack on one of the greatest scourges to which human flesh is heir—cancer.

The fact that to date medical science has been unable to ascertain the cause of cancer or to find a specific cure, once an advanced stage of the disease has been reached, should not dispose people to throw up their hands and admit defeat, but, on the contrary this, coupled with the further fact that the disease is on the increase, should act as a stimulant to the efforts which are now being instituted, first to mitigate the extent and severity of this menace and later, perhaps, to ensure its eradication.

Public Aid Needed

Eminent medical authorities, who have just completed a mission tour across Canada in an effort to enlist public support for an organized campaign against this dread disease, freely admit that the medical profession can do nothing more than it is now doing in its attempts to reduce the incidence and death toll from cancer without public support.

In other words, it is made quite clear that unless people who have cause to suspect or fear cancerous infection of their bodies, visit their doctors on the first breath of suspicion and thus ensure early diagnosis, there is no possibility of further reducing human suffering and loss of life from this cause, at any rate until such time as its cause and cure may be discovered in the laboratory, or elsewhere.

This, of course necessitates general public knowledge of symptoms which may or may not indicate the onslaught of cancer in its earliest stages. In view of the insidious nature of the disease, this knowledge is the most valuable ammunition which can be used in the battle against cancer at the present stage of medical research and must remain so until science itself reveals some of the mysteries surrounding its cause and cure.

Public Enemy No. 2

The facts show that in this country cancer ranks second to heart disease as the greatest killer of mankind. Last year between 11,000 and 12,000 residents of this Dominion died from cancer and next year the disease will send as many or more to an untimely grave, unless the public take the necessary precautions to reduce the toll.

That it is not difficult to take out at least a partial insurance policy against death from cancer is quite evident when the list of conditions which may indicate cancer in its early stages, as outlined by these authorities are known and heeded. They are: a cracked lip which won't heal; a sore tongue which continues to be sore; a hardness or lump in the breast which gives no pain; a hoarseness of the voice which persists past the duration of a common cold; difficulty in swallowing food; symptoms of vague indigestion on the part of those who thought they had a cast iron stomach; a wart or mole which for no particular reason begins to grow rapidly; an unnatural and persistent bleeding from any orifice of the body or a comparatively sudden alteration, in any manner, of usual bowel evacuation habit.

"If you have discovered any of these signs and symptoms," according to Dr. A. T. Bazin of Montreal, Professor of Surgery at McGill University, "the chances are three to one against cancer, but on the other hand the chances are one in four that early cancer is the cause."

If this information means anything at all, it indicates the immediate necessity of the person noting any one of these suspicious conditions immediately consulting his or her physician and then as Dr. Bazin says: "the problem is then his, also the responsibility, unless you refuse to accept his advice."

A Delayed Campaign

In the light of the unchallenged statement that a large percentage of cancer victims do not present themselves to their medical advisers until they have passed the stage when a cure might be effected, the value of the information now being given to the public through the efforts of the Canadian Medical Association and the Canadian Society for the Control of Cancer can readily be understood. The pity of it is that this campaign has not been initiated earlier in Canada as it has been in some other countries. Many lives now lost might have been saved.

Taking into consideration the nature of the disease, its growing incidence and the urgent necessity for public enlightenment if its toll is to be curtailed, the argument that the medical profession may frighten the people to death by giving the information necessary for their protection is entirely specious. Lord Moynihan of Leeds and London, England, one of the greatest of British surgeons who instituted a similar campaign in the Old Land is quoted to have met this charge by stating: "I am frightening them to life." As Dr. Bazin states: "Many people have died from cancer. No one has died from fear of cancer."

Earnings Of The Quinns

Will Continue Research

Audit Of Their Finances Shows Professor Freund, Formerly Of Vienna, Working In London

The Dionne Quintuplets have earned \$800,000 since their birth four years ago last May 28, it was revealed recently in audited statement of their finances. The statement was made by Percy D. Wilson, Ottawa, one of their guardians, and Keith Munro, their business manager, to a meeting of the board of guardians at North Bay, Ont.

In ancient Russia unfaithful wives were buried waist deep in damp earth and left to die of starvation.

Government statistics show that the average family in Australia eats 1,172 kinds of food.

TAKE THE LEAD OUT OF YOUR LEGS

Get Oxygen in Your Blood and You'll Get the Pep that Sends You Bounding Up the Stairs.

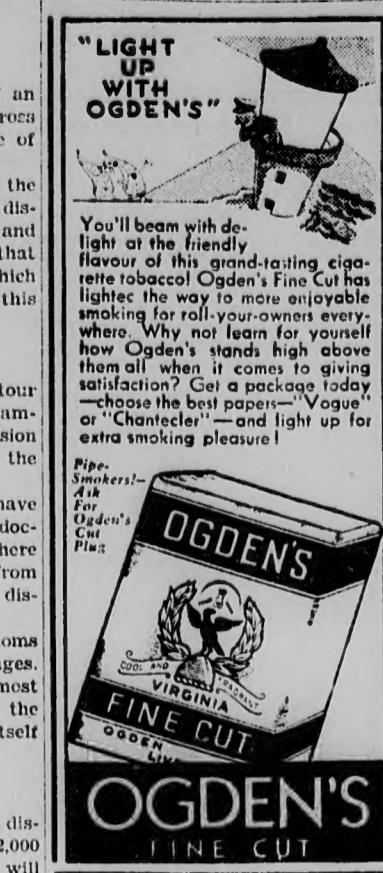

People who smother to death die from them. Just as surely you are slowly smothering if your blood lacks red corpuscles. Red corpuscles are your oxygen-carriers. They carry the oxygen you breathe in to every part of your system. Without enough oxygen-carrying corpuscles, your kidneys, liver, stomach and bowels slow down. Your skin gets pale, flabby, often pimply. Your nerves may become jittery—you tire quickly—

What you need is Dr. Williams Pink Pills. These tiny pills help you make more and better red corpuscles and thus increase the oxygen-carrying power of your blood. Get Dr. Williams Pink Pills today at your druggist and see for yourself how quickly this time-proven blood-builder will help give you back your pep. Copyright 1938, G.T. Fife and Co., Ltd.

Hardship Persists
Many folks now have electric clocks and are relieved of the hardships of our forefathers who had to wind the time-piece nightly. However, no mechanical gadget yet has done away with the necessity of putting out the cat.

A lightweight, collapsible, portable house designed for conveyance on the roof of an automobile has recently been patented. It is reported that the house will sell for less than \$100.

A good deal of horse sense went with the horse

Had Equal Right

Quick-Witted British Surgeon Had Prussian Officer Stumped

It is said that the face of Sir Louis Grieg seems always on the verge of laughter. King George V, once remarked that the company of Sir Louis was like a bracing tonic. Sir Louis and the present King were boyhood friends. They were together in the training ship Cumberland. Later Sir Louis became the Duke of York's equerry. He has been a sportsman all his life. As a youth he captained the Scottish international football team four times. In tennis he and the Duke of York won the doubles title in the Air Force. He served overseas as a naval surgeon. After the fall of Antwerp he was captured when he stayed behind to tend the wounded. A typical Prussian officer demanded of him: "What are you doing in Belgium?" Quick-witted Sir Louis replied: "If it come to that, what are you doing in Belgium?" The Prussian was stumped.

SELECTED RECIPES

CHOCOLATE FUDGE

3 cups white sugar
1/2 cup Bee Hive Golden Corn Syrup
1/2 cup milk, evaporated
1/2 cup water
2 tablespoons butter
2 squares cooking chocolate
1 teaspoon vanilla
1/8 teaspoon salt

Melt butter and chocolate slowly together. Add all other ingredients except vanilla and boil until it forms a firm ball in cold water, stirring occasionally to prevent burning. Remove from fire and let stand until lukewarm. Add vanilla and beat until it gets heavy, when immediately turn it out on buttered tin. Nuts, cherries or raisins may be added while beating.

DIVINITY FUDGE

1/2 cup Bee Hive White Corn Syrup
1/2 cup cold water
2 cups white sugar
2 egg whites
1 teaspoon vanilla
Few grains salt

Cook syrup, water and sugar together until it forms a firm ball in cold water. Beat egg whites with salt until stiff, and gradually add hot syrup. Add vanilla and beat until thick. Variations: Broken walnuts, dry cherries, chopped candied ginger, etc. Turn on buttered pan.

Here's A Suggestion

How To Keep Roosters From Crowing Early In Morning

Pubelo police urged local poultry growers to follow the suggestion offered by Laura M. Smith, of Canon City, Colo., for making possible a morning sleep in the vicinity of a chicken ranch. "We rebuilt the hen roosts and placed them near the ceiling so that when one would raise his head to crow he would bump his head on the ceiling and change his mind," she explained. "So they never crowed until they were on the ground."

The 20 Latin American countries are estimated to have now over 130,000,000 population.

Persia Completes Railroad

Built 866-Mile Line Without Any Outside Financial Help

By completing the railroad from Bandar Shah on the Caspian Sea to Bandar Shapour on the Persian Gulf the government of Iran (formerly called Persia) has provided a means of transportation from north to south which is confidently expected not only to promote the development of the country but greatly to improve its means of defense. The road is 866 miles in length, in the south crossing the Luristan Mountains at a height of more than 7,000 feet and in the north rising almost to the same height in the Elburz Mountains.

Work on the line was begun seven years ago, and the section from the Caspian coast to Teheran, the capital, was opened by the Shah on February 10, 1937. It was supposed that the line would not be opened from sea to gulf until next year, but the constructors appear to have built faster than they expected. The cost of the railroad has been defrayed by Iran without aid from beyond its own borders. This imposed hardships on the country, but it may be repaid for these by the fact that it has no foreign bondholders to consider.

The Shah went by train to Safid Cheshmeh, 20 miles south of Teheran, on August 28, and himself completed the line, a brilliant assembly being present at the ceremony. Throughout the country as well as along the route the meeting of the rails was celebrated and Teheran was decked with flags.—New York Sun.

ARMS USELESS ON A WET DAY

Rheumatic Pains Relieved By Kruschen

Here is a noteworthy instance of the manner in which damp weather can affect the joints of one who is subject to rheumatic pains.

"I had been suffering from rheumatism very badly," a man writes, "and had such pains in my joints that I could hardly bear it, on a wet day especially. It pained me terribly to use my arms, and I was hardly able to work. I tried two different remedies, but I was still as bad after the treatment."

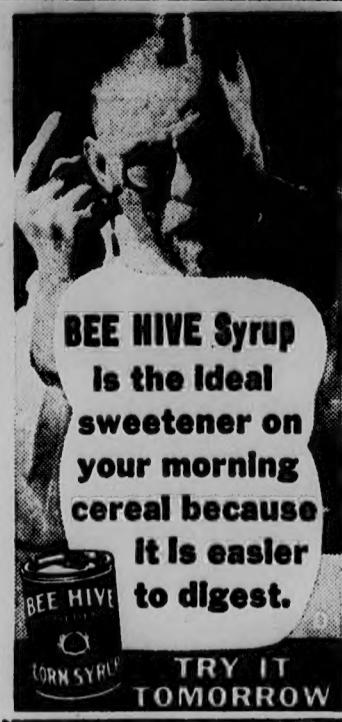

"Then I was told to try Kruschen Salts, which quickly brought relief. So of course I have kept on with it, and I am now much better and have never felt so fit for years. I used to feel so miserable and sluggish, but now it is a pleasure to be able to work."—S.B.

The pains and stiffness of rheumatism are often caused by uric acid crystals in the muscles and joints. The numerous salts in Kruschen assist in stimulating the internal organs to healthy, regular activity, and help them to eliminate excess uric acid.

Many Things Happened

Excitement Crowded Into Five Minutes When Wine Cask Exploded

Explosion of a wine cask in the basement of a distributing company in Chicago, Illinois, caused: The injury of one workman; the splashing of 1,650 gallons of port all over the cellar; tripping of the sprinkler system which flooded the plant and turned in a fire alarm; collapse of a firebrick wall and the shattering of plate glass windows—all within five minutes.

Possessions Of Famous People

Souvenirs Which Would Be Valuable Have Not Been Preserved

Sir Hesketh Bell has had a varied pro-consular career. It ranged from the Bahamas to Uganda, where he was the first of Governor. He is now 71, and a very old family friend of the Chamberlains. Joseph Chamberlain left him his historic eyeglass on his demise.

Apropos of which it is a really intriguing problem what actually happens to the distinctive possessions of famous people. What has happened, for instance, to the late Lord Halidane's walking stick, made of high explosive, which used to put the wind up for M.P.'s? Who now possesses the late Earl Balfour's fiddle, on which that great philosopher was wont to amuse himself in leisure moments? Are any of the G.O.M.'s much-caricatured Gladstone collars still in existence?

Some souvenirs of this personal genre no doubt find their way to Madame Tussaud's but there are a legion of others.

Menu Cards Were Popular

Guest At Royal Luncheon In Versailles Wanted Extra Copy

The menu for the state luncheon at Versailles this summer, honoring the British King and Queen, was printed on cream paper in the style of type found in first editions of Voltaire. So popular were the menu cards that one guest was heard to offer £2 for an extra copy to take back to his family. Each guest received a reproduction in bronze of the famous medal struck by Louis XIV. to commemorate the completion of the chateau in 1687. The King and Queen received similar medals in gold.

Changed Very Little

The air pioneer Orville Wright, was 67 on Aug. 20. It is 35 years since his famous flight with a heavier than air machine, with his late brother. It is said that the control system he invented has changed very little.

Like human beings, gorillas normally are right-handed.

Production Stage Reached In Gold Mining Activities In Northwest Territories

Gold mining activities in the Canadian Northwest Territories have now reached the production stage, with the commencement of milling operations on the Consolidated Mining and Smelting Company's "Con" property in the Yellowknife area. The first gold brick, weighing 72½ pounds, was poured on September 5, and marked the start of actual gold production after more than three years of development and exploration work. According to the Mining Recorder of the Department of Mines and Resources, stationed at Fort Smith, N.W.T., the Yellowknife-Gordon Lake district continues to be the centre of great activity with several well-organized companies carrying out development work and numerous prospecting parties engaged in field work. Negus Mines Limited are erecting a mill on their property located a short distance from the "Con" mine, and Ora Plata, Chan Yellowknife, and others are actively engaged in the development of prospects in the same general vicinity. Approximately 4,000 claims have been staked in this region.

In the Great Bear Lake area, Eldorado Gold Mines Limited are treating about 85 tons of ore a day from which three to four grams of radium a month, as well as considerable amounts of silver and uranium products are being obtained. The high grade pitchblende ore and concentrates are shipped to the company's refinery at Port Hope, Ontario, for refining, while the silver concentrates are shipped to an American smelter. Recent improvements at the Eldorado mine include the extension of the power-house to provide for two additional 200 horsepower Diesel electric units, and the erection of a 70,000-gallon tank for oil storage. At the pitchblende-silver property of the Bear Exploration and Radium Company about 25 men are employed on surface work, general maintenance and freighting. During the month of August the mill at this mine operated 24 hours a day.

Prospecting and exploratory parties are continuing field work with several promising finds reported in areas to the north and east of Yellowknife. Many claims have been staked during the past few weeks as a result of new discoveries at Murray Lake, Macdonald Lake, Pensive Lake, Thompson Lake, Francois River, Turnback Lake, Beaulieu River and Sunset Lake.

Altogether a total of some 45 mining and exploration companies and syndicates are participating in the development of properties in the Great Slave-Great Bear Lakes mining field. Listed among these are Eldorado Gold Mines, Consolidated Mining and Smelting Company, Mining Corporation of Canada, Dome Mines Limited, Anglo Huronian Ltd., Ventures Limited, International Mining Corporation, and several other well-known Canadian mining enterprises.

Officials of the Department of Mines and Resources just back from a tour of inspection of schools, hospitals, government offices and mining districts in the Northwest Territories while enthusiastic about the development which has taken place have repeated the warning issued some time ago by the Minister that there is no chance of employment unless arrangements are made in advance. The prospecting season is now drawing to a close and with the coming of winter construction and other outside work will be ended for this year. Men already under contract for the development work programs scheduled to proceed through the winter on widely separated properties will remain in the North, but many prospectors, miners and construction workers will soon return south to await the resumption of field activities next summer.

The Indians believed the soul left the body through the mouth and that an Indian who died of strangulation would be cut off forever from the happy hunting grounds.

Interviewer: "What have you to say about anonymous letters?"

Professor: "They're stupid! I read them but I never answer them."

The First Saxophone

Man Who Brought It To Canada Wishes He Hadn't

Swing orchestras and jam sessions just don't seem to fit in well with memories of concerts at the start of the present century, which may explain why the man who brought the first saxophone to Canada wishes he hadn't.

Edmond Hardy is nearing his 84th birthday now. He has retired from orchestra work, and lives quietly in his suburban Montreal South home. "If I had known what they were going to do with it, I would never have introduced the saxophone to Canada," he avers with a bit of a shudder.

For 60 years after he had founded it Hardy led the Harmonie Montreal, a band that performed at all kinds of important functions not only in Quebec, but throughout eastern Canada and the United States. His bulky scrapbook is a chronology of social events for the half-century from 1874 onward.

He made his last appearance as a band leader five years ago when he led 105 musicians from his own band, and the bands of the Grenadier Guards, Victoria Rifles, Black Watch, Royal Montreal Regiment and the Fusiliers de Montreal, at the funeral of Calixa Lavallee, composer of "O Canada".

To get back to that first saxophone: Hardy had it made to his order in France and brought it back to Canada. He was conducting a music business in Montreal at the time, and sold the instrument a short time later. He imported more and sold them, too, and soon built up quite an addition to his trade. But he still wishes he hadn't.

Probably Means More

Husbands Warned Against Cooking Dinner Once A Week

Possibly some husbands missed a recent news item stating that New York University is about to open a cooking course for men only. The conductor of that course, Miss Gladys Curry has for her slogan: "Every husband should cook dinner at least once a week."

"At least once a week" may be all right. But how long would it be before this meant Mondays, Wednesdays and Thursdays? Miss Curry's approach is diplomatic, but kind words butter no parsnips. She says that men have a "more scientific mind," more "natural mechanical ability" and "can turn out quite a palatable meal from a simple recipe." Yes, indeed. And possibly they can wash the dishes better and scrub the floors more neatly.

Husbands who know their rights will be on guard. If a man wants to be a chef, let him. All the best cooks are men, anyway. But it is not right that a wife should say to her husband, "I wish you could learn to bake the kind of bread that Father used to make." — New York Times.

Thatcher Wheat

New Rust-Resistant Wheat Makes A Good Showing This Year

Thatcher wheat in Western Canada suffered from leaf rust this year but "stood up first rate" as far as the more serious stem rust was concerned, Dr. L. H. Newman, Dominion cerealist, said.

"We have known for some time that Thatcher was susceptible to leaf rust and this year it came early and was severe," he said. "There was leaf rust damage to Thatcher in Manitoba particularly but even the damaged stands did infinitely better than the ordinary non-rust resistant varieties."

Dr. Newman stated Thatcher generally had made a good showing in Canada and experiments were continuing to eliminate the leaf rust.

Large Hangar For Toronto

John Schofield, chief architect of the Trans-Canada Air Lines, announced construction of a \$125,000 hangar for the air line at Malton airport, 10 miles northwest of Toronto, would start at once and be completed by Jan. 1.

Uniforms For Reporters

Frederick T. Birchall Describes Nuremberg In The New York Times

Even German newspaper reporters now wear a uniform, and a sad affair it is—a matter of brown shirt and tunic, black trousers and brown peaked cap, making the stout ones look like Storm Troopers gone to seed, while the little ones resemble under-developed Boy Scouts promoted for diligence to the dignity of "long pants".

The Italian correspondents all wear Fascist uniforms when they must. They contrive to escape sometimes into the freedom of civil garb. — The foreign correspondents from free countries retain liberty in the matter of attire, and they are tiny islets in the Brown and Black ocean.

The plight of their less fortunate brethren has produced among the British, French and Americans a reaction toward ploughers, slouch hats or no hat at all.

Being hatless, even if not lacking nature's head covering, has its advantages because one does not have to watch out for the endless passing flags; one has nothing to remove. It is a great timesaver because the banner parts of the processions sometimes extend for a block or so.

All German diplomats are in uniform day and night. Theirs is black with silver buttons and with silver stripes down the trousers. High boots seem optional.

The dress uniform for evenings, however, is a stupendous affair, with tails, wider silver stripes, silver cord festoons from chest to shoulder and a profusion of silver foilage—apparently tropical, since it corresponds to nothing in this climate—around the collar and lapels. Over all this is worn a long cloak with a silver spread-eagle below the shoulder.

Thus, although the German diplomat may seem a mere blood brother to an admiral in the daytime, after dinner no hall porter in any fashionable hotel anywhere is more resplendently caparisoned.

A Common Grievance

People Object To Half Introductions And Mumbled Names

At C. N. E. Press Day, I met a man who has a grievance, and he wanted me to voice it on this page, says J. C. Kirkwood, in Marketing. I willingly do so, because it is a common grievance namely: men introducing a friend mumble his name.

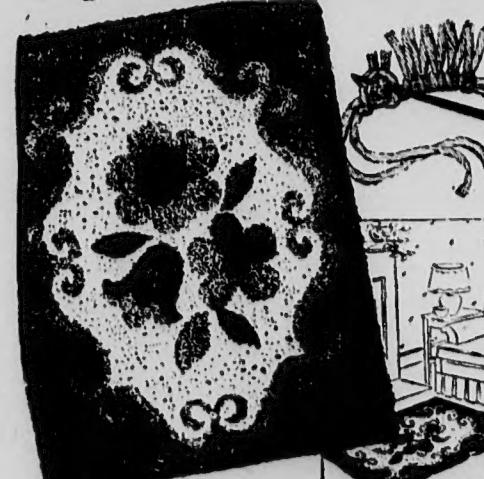

Now, most of us want to hear clearly the name of the person introduced, and likewise the man introduced wants his name articulated clearly.

Once I heard a 90-year old man dodge his obligation quite nicely. He was on the staff of Belfast City Hall.

At a reception given by the Lord Mayor this ancient gentleman was supposed to introduce all arriving guests to the Lord Mayor. His way of doing his job was to turn to the guest, and say, "This is the Lord Mayor" and the Lord Mayor shook hands with several hundred unnamed persons. This same way of making introductions is used by a good many persons only half 90 years in point of age.

England has a movement for abolishing dog licenses and taxing bicycles instead.

Rug Made of Easy Crocheted Strip

PATTERN 6166

Here's a new wrinkle in the art of rug-making. A rug made in a continuous length—just short ends caught through with a crochet hook—the strips then sewn together. The result a rich design—a luxurious pile. Use candlewick, rags or yarn. Pattern 6166 contains instructions and charts for making rug; illustrations of it and of stitches; materials needed; color chart. To obtain this pattern send 20 cents in coin (stamps cannot be accepted) to Household Arts Dept., Winnipeg Newspaper Union, 175 McDermot Ave. E., Winnipeg.

There is no Alice Brooks pattern book published.

Farm Of The Future May Be Called Upon To Produce Many Things Besides Food

Can Design Airplane

Daughter Of Late Forbes-Robertson Very Adept At Work

Mrs. F. G. Miles, eldest daughter of the famous actor, the late Sir Johnston Forbes-Robertson, is the first woman to be appointed a commissioner for the new Civil Air Guard for Britain. She can design an aeroplane complete with all the mathematical requirements that an engineer knows as "stresses and strains." She is as adept with a slide-rule as she is at arranging flowers or running a home.

Six years ago, Mr. and Mrs. Miles, recently married, arrived at Reading in a motor caravan with a big idea and little capital. They had met at an aerodrome, where Mr. Miles had been an instructor and Mrs. Miles (formerly the wife of Lord Ratten, Lord Willingdon's heir) had come to learn to fly. Their idea was the first cheap, light airplane.

The new machine was an immediate success and now the firm with which Mr. Miles is associated has become one of the biggest constructors of civil and military light airplanes in Britain.

Youth Training Program

Fifty Thousand Canadians Have Profited By The Plan

With particular emphasis on placement features, the Dominion-provincial youth training program for the present fiscal year is making excellent progress, the federal labor department said.

"While it is naturally too early to determine with accuracy the number of young Canadians who will benefit by the plan this year it is probable that last year's figures will be equalled if not exceeded," the department's statement said.

"Approximately 50,000 Canadians between the ages laid down in agreements with the provinces have profited by the program. The exact figures are: Men, 32,301; women, 23,156, or a total of 55,457. Last year the amount voted by parliament was \$1,000,000. This year the Dominion's contribution is in the neighborhood of \$1,500,000. Provinces contribute on a 50-50 basis to the expenditure."

Correct Measurements

Dr. Pullfast, a prominent dentist in the west, received a letter the other day from a man in the next county which said: "I've heard tell of your skill as a dentist and I would like some of your teeth. As I am busy with my spring work I will give you the measurements. My mouth is three inches wide across, five-eighths of an inch threw the jaw, and some hummocky on the edges. Jaw is shaped like a hosseshow, with the toe forward. If you want me to be more particular, I will have to come that."

England has a movement for abolishing dog licenses and taxing bicycles instead.

A recent news item gives Mr. J. W. Paton of Montreal credit for saying that there are 3,500,000 milking cows in Canada and that there are 318,000 farmers engaged in this branch of agricultural activity. He also stressed the growing importance of the industry for supplying, in addition to the dairy products so well known, the raw material (casein) for synthetic wool. It is stated that there is a very thriving industry being developed in Holland, Italy, Czechoslovakia and Belgium for the manufacture of synthetic wool from casein and that it is bound to grow in other countries. The production at the present time is around 25,000 pounds a day.

On this side of the Atlantic we have not been forced to make so much use of synthetic products to replace declining supplies of natural products but it is safe to say that there will be more as time goes on. Milk powder, casein, many vegetable oils, soya beans, wood, straw and cornstalks and many other vegetable products are already furnishing the materials for the manufacture of many useful articles of commerce. There is nothing about the modern motor car to indicate that soya beans had any connection with its manufacture, yet Henry Ford uses thousands of them annually in the development of automobiles.

The farm of the future may produce many things besides food. As the natural resources of the lands are dissipated, we shall have to turn more and more to the farm to supply the materials to provide clothing, shelter, motive power and countless other materials. Present estimates of the world's resources of oil indicate that the next quarter century will see them pretty well up. What then? Experiments have already shown that good motor fuel can be produced from materials easily grown on the farm.

Farms and farmers are very important factors in the well-being of the nations to-day. It is also indicated that this tendency will increase rather than decrease so it behoves the farmers to view their profession with this in mind. Present tendencies of so many to disregard the effect of individual action upon the whole industry are to be lamented, especially when individual action destroys confidence in the products turned out. Farmers to-day are somewhat at the mercy of better organized interests in that they have very little to say about many of the vital points concerning their business. The importance of farm products in the general scheme of things is reflected in the figures of trade and commerce, but the importance of the farmer is reflected in his own attitude to himself and his business.

New uses will continually be found for farm products and producers will be on the alert for new outlets for their wares but whatever happens the collective relationship of the various members of the industry should not be lost sight of. If new branches of the farm industry are being developed, why not give them the kind of consideration that will insure rightful recognition. Should not farmers' organizations be prime movers in this direction to encourage new developments in the uses of their products?

Set Bad Example

Says Introduction Of Guns By White Men Caused Indian Troubles

The Indians never bothered much about large-scale massacres until they learned to handle white men's guns. Prof. T. F. McIlraith said in a lecture to school teachers in the Royal Ontario Museum at Toronto.

The professor, an expert on Indian life, said it was "hardly fair" to blame the Indian for being war-like when actually he only learned the art after copying the white man and arming himself with the white man's guns.

When we see a meteorite that appears to strike the earth, we know we must be at least 200 miles away, since it disappeared below our horizon while still high enough in the air to appear luminous.

The Shelter of Trees.By J. L. Irwin, Statistician, Dept. of
Lands and Mines, Govt. of Alta.Just what the value of a shelter-
belt of trees can mean to either the
farmer or market-gardener in Al-
berta is most forcibly demonstrated
by a visit to the grounds at Oliver
just east of Edmonton.These plantings were started in the
autumn of 1930 and covered, to begin
with, an area of 5 acres. Prior to this
innovation constant wind storms in
the neighborhood of this particular
location had removed much of the
top-soil, leaving an arid and barren
tract of land, whilst hundreds of
tons of good soil lay useless by the
sides of roads and fences, waiting
to be put back if a fertile area was
to be created.It was put back, and wind-breaks
of young trees were immediately
planted to protect the area from fur-
ther dangerous drifts. With care
and expert attention growth was re-
turned to what had been wilderness;
the trees flourished and a garden of
astonishing fertility has resulted.Since that date hundreds of thou-
sands of young trees of every variety
have been sent out year by year to
every part of the province by the
Forestry Division of the Department
of Lands and Mines.The wind-breaks at Oliver rep-
resent many types of trees, the
purpose of the Forest Service being to
ascertain and demonstrate those
most suitable for general use. The
varieties include: lodge pole pine,
Siberian larch, Russian poplar, car-
agana, jack-pine, Scotch pine, white
spruce, Douglas fir and willows.
Many others could be named.To give an idea of the true value
of a wind-break it might be stated
that every foot in height of trees
protects at least fifty feet of soil
from dangerous or adverse winds
which may cause soil to drift and
growth to be retarded.The shelter-belts grow remarkably
quickly. At Oliver the lode-pole
pine planted in 1932 is from 12 to
14 feet in height, the caragana planted
in 1931, 12 feet, and the Russian
poplar planted in 1930, 32 feet. In
a very short time after the planting
of such shelter the danger of destruc-
tive winds is eliminated.An example of the benefit of this
protection was given one day when
seeding was carried on without dis-
turbance at Oliver during a wind
velocity of 35 to 40 miles per hour.
Outside such shelter this would have
been impossible. A wind-storm in
June of this year reached a fury of
85 miles per hour, but it left the
sheltered growth at Oliver safe and
intact.As a result of wind-break protec-
tion a crop of vegetables was harvest-
ed this year by the end of July and
reseeded with onions in August, re-
sulting in two crops for one season.
Without a shelter-belt this could
never have been accomplished.The rapid and prolific growth of
flowers, vegetables and crops protect-
ed from prevailing and destructive
winds, is nowhere more noticeable
than at Oliver. A visit to this spot
will demonstrate not only this fact
but will show also how ground may
be reclaimed by such a process and
how it may be lucratively employed.Nor is this all. Trees bring birds
and birds, especially robins, keepthe cutworms down. Song-birds,
also, are always a much desired fea-
ture to a home.Wind-breaks, in addition to these
great uses, are also things of beauty
with their ever-increasing foliage.
Trees are the answer to many prob-
lems in Alberta as elsewhere. Their
relationship to success and happiness
of home and community life is a
very real one. So real, that their
protection and increased production
should at all times be matters of
first importance in the public life of
the province.**The World of Wheat**By H. G. L. STRANGE
Director "Crop Testing Plan"The whole world has had a mira-
culous escape from a devastating war.Had war occurred, millions of lives
would have been lost, and billions
of dollars worth of property would
have been destroyed. The danger
came because of the determination
of Germany to acquire new lands.Some people consider that the
German, and one can add to this
the Italian and the Japanese, mo-
tives are those of unwarranted ag-
gression, of a love for war.A study of Hitler's books and
speeches, however, and of matters
underlying worldwide economy,
convinces me, at least, that the real
motive actuating the aggression of
Germany, Italy and Japan are simply
that of a desire to secure the essential
food-stuffs and raw materials
necessary for the welfare of their
people, and which products today
are denied to them, in the qualities
they need, by the high tariff poli-
cies of the democratic countries.The way to satisfy Germany and
other "have not" countries, and so
to avoid war in the future, in my
humble opinion, is simple. It is to
reduce existing high tariffs, and so
permit the exchange of more raw
materials and food-stuffs of the
farmers for more of the goods and
commodities of the world's indus-
trial workers.Following factors have tended to
raise price: Depreciation of the
pound sterling -- Australian crop
starts to deteriorate, unlikely to ap-
proach last year's outcome -- India
purchases Australian wheat -- Rou-
manian wheat heavily infected in-
fected with wheat bug -- Uneatis-
factory soil condition in U.S. South-
west -- Russian threshing still behind
a year ago.Following factors have tended to
lower price: Further beneficial rains
in Argentina -- Russia exports in
volume -- Pressure low grade French
wheat -- Abundant subsoil reserve
in Balkans -- Belguim releases wheat
held for emergency -- European
winter wheat sowing progresses nor-
mally -- Native wheat supplies abun-
dant in most of Europe -- U.S.A.
corn, oats and barley estimates
increased.**CLASSIFIED ADS.**Lost. -- Sum of Money in Didsbury

Will Rogers**In “Judge Priest.”**

Girl Guides, Rangers and Junior Red Cross Present Notable Picture Next Wednesday.

“Judge Priest,” one of Irvin S Cobb's interesting and most beloved characters, will be brought to the screen at the Didsbury Opera House next Wednesday night, October 26, under the auspices of the Girl Guides Rangers and Junior Red Cross.

The late Will Rogers as “Judge Priest” portrays one of the most lovable characters that ever came to the screen; he serves out justice with both humor and pathos. The story is one of the masterpieces of the South and told only as that fine humorist, Irvin Cobb, can tell a story. Rogers is ably assisted by Rochelle Hudson, Tom Brown and Anita Louise, and everyone will enjoy Stepin Fetchit, the colored boy.

The film is not a new one—but is one that is well worth reviving, and even if you have seen it you will appreciate seeing it again—so come out and enjoy yourself and at the same time do your bit to help the crippled children whose welfare is the aim of the Junior Red Cross.

To round off the evening's program a dance will be held after the show.

Church of England Notes.

A splendid congregation greeted Archdeacon Swanson last Sunday afternoon. We would like to see more of our members and friends on future occasions. The next service will be a celebration of the Holy Communion at 10:45 a.m. November 6th instead of October 30th as previously announced. Rev. A. D. Currie will officiate.

Rugby Notes

The October W.I. meeting, which was postponed because of bad roads, was held last Thursday at the home of the secretary. There was an attendance of 30 and after a short business session Mrs. C. Bury of Olds gave a very interesting address on new Legislative Acts and Amendments, the new Divorce Law in England and other acts. Mr. and Mrs. McArthur then brought greetings from the Westward Ho W.I. Two vocal solos by Miss Lucille Russell rounded out a full afternoon program. The meeting adjourned with the national anthem and lunch was served. The November meeting will be held at the home of Mrs. O. Krebs. Mrs. F. Byrt was the lucky holder of the winning number on the quilt which was raffled at this at the meeting.

Scout and Cub Corner.

Scouts will muster 7:30 p.m. to night at the Hall Duty Patrol: Wolves.

1st CLASS TESTS
Pioneering: Scouts Don Mortimer and Eldon Foote.—Passed on “the proper use of an axe for felling and trimming light timber.”

2nd CLASS TESTS
2nd Class badge will be awarded to Scouts Bill Newton and Don Dunlop.

TENDERFOOT TESTS
Investiture and badge will be conferred upon the following boys: Eugene Duran, Neil Gochee, Lloyd Vogel and Arthur Green.

PROFICIENCY BADGES
Scout Don Mortimer.—For swimming, Camp Woods, August 1938.

Burnside Notes

Walter McCulloch was a Monday visitor in the southern city.

Mrs. Fred Thompson returned on Saturday after spending a week in Calgary.

Joe Davidson returned last week from Kimberley, B.C., where he had been working for some time.

Mrs. N. Eckel and Robert were visitors on Wednesday afternoon at Cremona.

Don't forget, folks, there's a dance in Lone Pine Hall this Friday evening, October 21st. Didsbury 5 piece orchestra will furnish the music.

Miss Ardella Bittner, of Calgary, is visiting her sister, Mrs. Walter McCulloch and other relatives in the district.

Carstairs E. Community

Henry Kimmel, who had been ill for some several years, passed away last Monday.

Mary Schmick, sister of Alex Schmick, died suddenly in Calgary last week.

The Baldwin family from Rockford are at present visiting their uncle, Levi Storey.

Mr. and Mrs. John Schmick, from west of Bowden, are visiting old friends here.

The Hall was filled to capacity—many having to return home last Friday night.

W. E. Rieder, son Wilbert and H. Anderson returned from their hunting trip with a full quota of antelope.

Thomas Lang left for Winnipeg in response to a telegram notifying him that his brother had met with a serious auto accident.

There will be special Hallowe'en features with a \$6.00 lucky ticket prize at the dance to be held in the Hall on Friday, October 28th.

Thomas Budd, while alone at home, fell unconscious and lay so for many hours. We are glad to hear, however, that Tom is back at work again.

**DRESSED FILLETS OF HADDOCK**

1 cup of milk
1/2 cup of flour
1 tablespoon of mustard
2 cups of grated old Canadian cheese
2 tablespoons of butter
fresh chopped parsley

Prepare a white sauce with the butter, the flour, the mustard and the milk; add the grated cheese, season. Wrap the fillets with damp cloth, cut in individual pieces, cover each piece with the cheese mixture, sprinkle with chopped parsley, place on well buttered oven dish, and cook 20 minutes in moderate oven. Fillets of any other kind of Canadian Fish may be used instead of Haddock fillets.

THE KIDDIES' EYES will sparkle when you bring in an appetizing platter of Fish. It's a dish fit for a king, with its delicious, palate-pleasing flavour . . . yet so inexpensive that you will have money left over for extra meal-time treats.

You can enjoy Canadian Fish and Shellfish all the year 'round—over 60 different kinds—fresh, frozen, smoked, dried, canned or pickled . . . as often as you wish. Many tempting recipes make it easy for you to offer delightful variety to hearty appetites.

WORKERS FOR WORLD PEACE

Although we follow with our hopes and our prayers the efforts of the many sincere workers for peace in the world today, we sometimes wonder why such endeavor should be necessary. We feel sure that the average man and woman in other countries are like ourselves. They want no war.

Has it occurred to you that many of these peoples, peace loving though they may be, are deprived of the information that would enable them to choose wisely their course of action? Instead of news they are given propaganda. The facts are colored or misrepresented or suppressed. They have been robbed of the right to think for themselves.

Perhaps a permanent peace could have no better practical foundation than a free press throughout the world. We who have free access to all the news, take it for granted and treat it lightly. Yet, having this pledge of freedom, we should cherish it, bringing our children up in the knowledge and appreciation of this safeguard to their liberties.

Use your opportunities to be fully informed on all matters that affect your life. Give your family the benefits that a good newspaper can bestow.

Read a Newspaper

Listen to the Program:
“THAT WAS THE YEAR”

Every Tuesday and Friday
At 8:15 P.M.—STATION CFAC

The Calgary Herald

WORLD HAPPENINGS
BRIEFLY TOLD

Horatio Walker, distinguished Canadian painter and native of Listowel, Ont., died in his home at Island of Orleans, Quebec. He was 80.

Plans for a mass migration of 750 Mennonites from Mexico to Canada apparently have been abandoned, according to immigration department officials at Ottawa.

H.M.C.S. Nootka slid into the water at Victoria, alongside the Esquimalt plant of Yarrows, Limited, and was fourth Canadian naval vessel to be launched this year.

Approximately 50,000,000 feet of Maine timberland fell before the onslaught of the recent hurricane, Forest Commissioner Waldo N. Seavey estimated.

Continued increase in savings accounts and an increase in deposits with the Bank of Canada featured the Aug. 31 report of chartered banks to the finance department.

More emphasis on youth programs was urged before the general council of the United Church of Canada by Judge F. A. E. Hamilton of the Winnipeg juvenile court.

Drilling of a deep-test well in the Lloydminster gas and oil field will be started shortly, it was announced. The well will be drilled by a concern to be known as "Lloydminster Royalties."

A gold medal presented to John Bright, British reformer, by the Birmingham Liberal Association in 1883 is missing from its case in Rochdale Art Gallery, the lock having been forced and a gilt replica left as substitute for the gold.

Information For The Future

Scientists To Leave Instructions In 800-Pound Metal Letter

Five thousand years from now historians will receive an 800-pound metal letter, a "time capsule" containing information about the present age. It will be deposited 50 feet below the surface of the New York World's Fair grounds. And if future historians find the capsule, major credit will go to a Canadian geophysicist, Sherwin Kelly, former professor of geology and mineralogy at the University of Toronto.

Mr. Kelly, an expert in electrical prospecting, will direct future historians to the cache of the capsule in a book of record which will be preserved in libraries, museums and depositories throughout the world. The message in the book of record will tell how the capsule can be located, using present-day electrical prospecting methods.

The "time capsule" will also contain statements of this age's scientific, engineering, industrial, social, religious and philosophical achievements. Motion pictures will show how we look, act, talk, and what hats the ladies wear.

Reflects Public Opinion

No Government Can Change Unless Majority Of People Do

Government reflects public opinion. If you want a different kind of government, you must change public opinion. The individuals who make up governments—local, state and national, know a great deal about public opinion because that is the most potent force in their careers, and over a period of time they become past masters in forming public opinion, first, because they have barometers in very frequent elections, and second, the very offices with which the people endow them give them standing in the court of public opinion.—Public Relations, New York.

A Useful Gadget

Science Service tells us that an electrical device which will turn water to steam in 15 seconds has been developed. The device is comprised of a small glass globe containing an electric coil. Incoming water is heated to the boiling point in 12 seconds and three seconds later becomes steam.

Perhaps you know that Italy has a king. But he is not working at the job.

Money is no homing pigeon; when it flies away it doesn't come back to roost.

Tragic Story

History Of The Colonization Of Greenland By Icelanders

Probably not in the history of colonial development is there a more tragic story than that of the colonization of Greenland by Icelanders nearly 1,000 years ago. The Danish government and its researchers have laid bare the whole gruesome tale of a 500 year effort that ended in the death of a population estimated at between 3,000 and 5,000. The world hardly realizes that Norway had actual control of the Greenland colony since 1261, and that it was sheer neglect which spelled the doom of its sons across the Atlantic.

Will the now available story of the Norse settlement in Greenland help in throwing some light on the "white" Indians of James Bay, and help also to establish the identity of the Europeans who discovered America?

Surely men who sailed across 2,000 miles of Arctic seas without compass or chart would not be deterred from crossing the short distance from the Norse settlements to the nearby mainland.

Can it be assumed that Norsemen in Greenland would fall in 500 years to explore their own immediate western neighborhood when it is known they explored far north in the Arctic seas?

Is it probable that one single small ship would carry enough men to so modify a James Bay tribe of Indians as to give it numerous members who to-day would be taken for white men if they wore white men's clothes?

Was there an effort of many members of the dying colony in Greenland to find a more fertile land? Or are the "white" Indians the descendants of sailors from Norway who were wrecked in James Bay?—J. W. Curran in Sault Star.

Good Little Chinese

Children In New York's Chinatown Never Get Into Trouble

It has taken the New York authorities concerned some years to enlighten others regarding the exemplary conduct of local Chinese children. However the information is no less interesting than it would have been if supplied earlier.

The organization which revealed to the world the unusually fine innate qualities of the little Chinese bears the slightly cumbersome title of the Joint Legislative Committee on Children's Court Jurisdiction and Juvenile Delinquency. The J.L.C.C.C.-J.J.D. is authority for the statement that among the 3,000 children in New York's Chinatown there has been only one case of juvenile delinquency in the past eight years.

The investigators went further and asked Chinese parents to what they attributed this record. The answer was as follows: 1. Among the young the most severe punishment is to "lose face". 2. The child is taught reverence for his parents.

Another Canadian First

Canada Ships Canned Tomato Juice To United Kingdom

According to the statistics of the Imperial Economic Committee, Canada leads in shipments of canned tomato juice to the United Kingdom. Arrivals of canned tomato juice at the principal British ports during the four weeks ended July 30, 1938, amounted to 7,057 cases, compared with 5,542 for the preceding four weeks, and 12,985 for the four weeks ended July 31, 1937. Canada supplied 4,648 cases, and the United States 2,409.

Imports of tomato juice into the United Kingdom during the first seven months of 1938 totalled 29,668 cases, of which Canada supplied 16,811, the United States 10,942, and other countries 1,915 cases.

Listed As Outstanding

Charlie McCarthy has talked Edgar Bergen into something else—"Who's Who in America." Ventriloquist Bergen is one of 2,545 newcomers among the 31,545 outstanding contemporary men and women whose biographies are included in the 50th anniversary edition.

Rouget de Lisle, French royalist, wrote the "Marseillaise," only to hear it as the battle hymn of the opposing revolutionist army.

Time flies, so don't put quicksand in the hour-glass.

FETCHING NEW "DIRNDL" DRESS!

By Anne Adams

"Debonair and individual" is the phrase for this striking new junior frock—and its new shirred waistline should make it the favorite of a "six to sixteen's" wardrobe! Anne Adams designed Pattern 4930 for growing bones—that's why elastic is such as plendiferous idea for those "dirndl" waist and sleeve shirrings, and it's very easily inserted. Don't you like the neat button-front yoke that merges into soft "action" gathers? So easily followed in the illustrated Sewing Instructor that a 'teen age lass could make this frock herself and find it almost as simple to do as a doll's dress. Sew it with short or long sleeves for classroom and after-school wear. Perfect in challis or synthetic!

Pattern 4930 is available in girls' and junior sizes 6, 8, 10, 12, 14 and 16. Size 10 takes 2½ yards 36 inch fabric.

Send twenty cents (20c) in coins (stamps cannot be accepted) for this Anne Adams pattern. Write plainly Size, Name, Address and Style Number and send order to the Anne Adams Patterns Dept., Winnipeg Newspaper Union, 175 McDermot Ave. E., Winnipeg.

A German Name

Local consulates seem not to be sure whether the word "Sudeten" is German or not. Irrespective of its origin, however, says the Toronto Star, it is (Lippincott's Gazetteer) the German name for the Sudetic mountains, and hence transferred to their inhabitants. The Sudetic range, or Sudetas, were known to the ancients as the Sudeti Montes.

Sir Walter Raleigh grew Ireland's very first potato in a garden, still in existence, located at Youghal, 30 miles from Cork.

To-day more rice is eaten in the world than any other food.

FAMOUS FRENCH BOXER IN NEW ROLE

Georges Carpentier, foremost in the ranks of contenders for the world's heavyweight pugilist honors of yesteryear, shown at Stoke Poges, England, with his daughter, Mlle. Jacqueline, who competed in the Girls' Open Golf Championship. "Gorgeous Georges" is still as dapper as in his fighting days.

This Fog Was Costly

Tied Up Liner Queen Mary For 12 Hours At New York

The New York Post says no fog was dense enough to subdue the gitter that tied up the Queen Mary for 12 hours recently on the very entrance to New York. She was bright with the gleam of gold and silver in the amount of \$45,152,000; \$45,000,000 was in gold, \$152,000 was in silver.

If there is any question in your mind that the fog doesn't run into money, consider that the Cunard White Star Line had to pay overtime to the customs inspectors and that the extra food bill, according to Chief Steward E. B. Pimbley, amounted to \$4,000!

The liner did not expect to serve breakfast as the Queen Mary was scheduled to dock so early; so first breakfast had to be served; then the boat was really trapped and luncheon was served and before the fog and tide came to terms, dinner was served.

All in all, 2,000 meals were served instead of 600.

No Puzzle For Him

Schoolboy Had Reason To Think He Knew Inspectors Age

An inspector of schools, determined to puzzle a class of boys, asked them this question in mental arithmetic: "If I had a field 100 yards long by 80 yards wide, and I employed three men for five days to plant it with seed potatoes at a guinea a hundredweight, how old am I?" The class was not unnaturally baffled, all except one boy who immediately raised his hand.

"Well?" asked the inspector slightly taken aback to find his challenge accepted.

"Forty-four," said the boy.

"How do you make that out?" demanded the inspector.

"Well," said the boy, "I have a brother who is 22 and he's half-draft."

A Wise Decision

Court Allows Young Stowaway To Enroll In Marine School

Bobby Stap, New York, hero of two trans-Atlantic and two coastwise stowaway trips this summer, has enrolled in the New York Merchant Marine School from which he hopes to graduate in eight months as a full-fledged cabin boy, ready and eager for the seven seas. The 13-year-old ocean hobo told the Children's Court, to which he had been committed for his waywardness, "I love the sea and I want to be on it."

Just A Mystery

Sipping an ice-cream soda in a Liggett store in New York, a girl noticed a sign pasted on the fountain mirror: "\$50,000 Chocolate Served Here." Being a simple, direct girl, she asked the soda clerk what it meant. "They sent the sign to us, sister," he said wearily, "but they never sent any explanation."

Adeline Patti, often referred to as the highest paid prima donna on the operatic stage, earned \$5,000,000 in her lifetime.

If a battery is fully charged there is no danger of its freezing.

The Famous Blarney Stone

Belongs To Castle Built In Ireland During 15th Century

Americans disappointed by the failure of a syndicate to induce Sir George Goldhurst, owner of Blarney Castle, to allow the famous Blarney Stone to be shipped to the United States on loan, may console themselves with the next best thing.

Two wooden crates, each containing a ton of limestone from a Blarney quarry, have been shipped from Cork to Los Angeles to the order of John Bodger, a resident of Hollywood. It is stated that the stones are to be made into tiny replicas of the famous Blarney Stone itself.

Sir George's objection to granting a lease of the Blarney Stone was that he could not be sure of getting it back at the end of the proposed seven-year period. Thousands of tourists visit the castle each year to kiss it so that they may be endowed with the supposed "gift of the gab."

In the Blarney neighborhood, the only magical properties the stone is believed to possess are those of attracting tourists.

The greater portion of the castle in which the Blarney Stone itself is fixed was built in the 15th century by McCarthy Laidir (Strong McCarthy), Lord of the Muskerry.

Origin of the term "Blarney" is traced to the delusive promises and evasive speeches of Cormac Dermot McCarthy, a descendant, when requested, according to a compact, to surrender to the Lord President, Sir George Carew.

Carew was the object of much ridicule at Elizabeth's court because of these protracted negotiations. On one occasion, when he had conveyed to her a particularly cajoling statement from the Irish chieftain, the Queen cried in exasperation: "This is more blarney. What he says, he never means." And so the "Blarney" became famous in the English language.

Is Really Important

Writer Tells Some Interesting Facts About Letter "E"

"Someone has decided," says an exchange, "that the letter 'e' is the most unfortunate letter in the alphabet, because it is always out of cash, forever in debt, never out of danger. No little credit is due, however, in that it is never in war, and always in peace. And we are deeply indebted to this little letter, since it is the beginning of existence, the commencement of ease, and the end of trouble. Without it there would be no meat, no life, and no heaven. It is the centre of honesty, and, although it starts off in error, it ends in making love perfect."

Earth Is To Blame

Changes Rate Of Rotation But Moon Keeps Even Pace

A scientist offered the moon exoneration of a 50-year-old charge of irregularity in its motion. Dr. Ernest W. Brown, professor of astronomy at Yale University, says the earth was to blame all the time. Writing in the annual report of the Smithsonian Institution, Dr. Brown said a check of observations of the sun, moon and earth for the last 150 years disclosed sudden, irregular changes in the rate of the earth's rotation on its axis. Half a century ago, astronomers believed it was the moon's motion which varied.

FOLLOW VICKS PLAN FOR BETTER CONTROL OF COLDS

Full details of the Plan in each Vicks Package

COPYRIGHT-COURTNEY RYLEY COOPER • • W.N.U. SERVICE

CHAPTER V.—Continued

Mrs. Joyce laid aside her green cigarette holder and with that queer, coldly acquiescent mood which seemed a part of her, joined the rest of the group on the tiny veranda. The moon had risen shimmering the great expanse of Sapphire lake, lying now like an irregular plate of silver between rugged mounds of black velvet.

"It's an inlet, over there to the right," Hammond said. "Land on that and you'll be safe."

"Safe?" broke in Kay, with a little laugh. "From whom?"

"The Mounties. This is a booze trip, isn't it?"

Kay faced the aviator. "Timmy! You haven't gone in for bootlegging already?"

The tone was jesting, but Timmy was tired.

"It isn't against the law to bring liquor from American territory to American territory. I'm not sneaking anything into Canada."

"Who's this fellow who hired you?" Hammond asked. Curiosity pulled hard at him; he was sure it was the man who had frightened Jeanne Towers. Timmy rubbed his round face.

"Damned if I know. He said his name was Lew Snade. I think he works for Around the World Annie."

Kay laughed, somewhat harshly.

"So that's what becomes of our darling Timmy. He comes into the new, unfettered North and immediately becomes a bootlegger."

It was badly timed. Timmy Moon's nerves were raw, from a long session at the stick.

"Well, at least I'm honest about it. I'm not being a damned pretender!"

"Why, Timmy," asked Kay, with an air of amazement. "Who's pretending?"

"We've all been pretending," said Timmy Moon. Jack caught the scent of liquor on his breath; and evidently Lew Snade, whoever he was, had been generous. "And I'm sick of it. We're up here and let's be honest as to why we're here."

"Timmy!" in the reflected light of the doorway, Hammond saw that the girl's face had gone white; there was rage in her eyes. The aviator did not notice.

"Don't Timmy me!" he exclaimed. "We're all broke and we might as well say we're broke and be done with it!"

"Perhaps you'd better go to bed," said Mrs. Joyce icily.

"I think that's a good idea," Hammond took him by the arm. "Time for us to go, Timmy!"

"Oh, all right." The round little pilot was grinning again. "I didn't mean to start any fireworks."

Hammond pulled him off the veranda and with an effort at a joking good-night to the two women, led him down the trail.

"Sorry I can't put you up in my

PATENTS

AN OFFER TO EVERY INVENTOR. List of Inventions and full information sent free. THE RAMSAY COMPANY, Registered Patent Attorneys, 273 Bank Street, Ottawa, Canada.

cabin," he apologized, when they were well along toward town. "But we've only got two bunks there."

"Oh, I couldn't go, anyway. I've got to get out too early." Timmy rubbed his hands over his face. "Wow, how a couple of shots can hit a fellow when he's tired."

"You rather spoke out of turn up there at the house," the miner suggested.

Timmy raised his head, pulling hard for air.

"Yeh, I guess I did," he confessed. "Kay will hate me for that. They've been trying to keep it dark that they haven't got a cent. But everybody in Seattle knows it. If it wasn't for the money that Bruce Kenning slips them, they wouldn't have a thin dime."

Hammond gasped.

"But they've always been the rich people of Seattle!"

"Yeh, with their heads in the air. But they can't hold 'em up any longer down there—that's why they were so glad to get out."

A certain grimness came into Hammond's features.

"Kay doesn't need to worry."

"Sure, not with you."

"Then lets drop the subject," the miner said quietly. "Besides, here's your flop joint."

Timmy Moon hiccuped.

"God!" he exclaimed, looking at the outlines of the log-cabin bedhouse, with its bear-tallow candle flickering behind a mosquito-net window.

Hammond slapped him on the shoulder.

"Get to bed, Timmy!" he commanded. "You've had a long day."

Then lonely, puzzled, a bit depressed, he went onward toward his dark cabin, where snored McKenzie Joe. This night of nights had not turned out at all the way he had hoped for it.

Morning, however, brought a spirit of gayety; everybody had been tired and excited the night before, Hammond told himself. Nevertheless, on his way from breakfast, he could not help turning toward the cabin-store of Jeanne Towers; nor could he conceal a certain expression of concern as she began what was meant to be a sprightly conversation about Hammond's guests. Then she turned to the subject of Timmy Moon's airplane.

"It's changed the whole camp!" she exclaimed, rearranging a few containers of dried food on the almost empty shelves. "Everybody's been asking me when I intended to lay in new stock."

"Buy me some tobacco that isn't half hay when you do," Hammond ordered, with a grin. "That's McKenzie's I've been using—he could smoke moose hide."

Jeanne got out a pencil and a sheet of paper; already there was the beginning of quite a list.

"I can't get it for a week or so," she said. "Mr. Moon is booked up until then. I was up early—but the Slumgullion people and the flop-house and the hotel were already ahead of me."

"What's a week?" asked Hammond. "You'll be the merchant queen

of Sapphire lake first thing we know."

"I'm afraid I'm getting as bad as you prospectors," came with an uneasy laugh. "I've been wishing for another mining rush."

"Why?" She shrugged her shoulders.

"Oh, I don't know—the excitement, I guess, the thrill of going somewhere." Then, "I'm sorry. That doesn't sound grateful."

"But this camp hasn't really gotten started." Quickly he asked, "Jeanne, what's bothering you?"

"Spring, maybe."

"Sure?" She fenceed. "What else?"

"Who was that man in the restaurant last night?"

"Oh, that!" she exclaimed, with a smile that for the moment disarmed him. "It was all too silly. I could have sworn I knew him—a boy I'd gone to school with up in—back home!"

"It was a mistake then?"

"Oh, yes. I'd looked up hurriedly—it was just like seeing a ghost. Did you hear me? I almost shrieked. The poor fellow must have thought I'd gone crazy. I did feel like an idiot."

Hammond agreed that it was indeed a silly feeling. Soon he went onward, again to take the trail up to the cottage. But he carried with him an uneasy presentiment that Jeanne Towers had not told the truth.

Kay was waiting for him, as well groomed as if she had come from a beauty parlor. Hammond watched the sun play on her hatless head, as with her mother, they went down the trail. Then at last, on the banks of Loon creek, the man pointed out the claim which he had saved for her, a stretch of gravel extending along the stream near where upturned stones and earth told of the workings held by McKenzie Joe and himself.

"I got them as near mine as I could," he announced.

"And is this a claim?" asked Kay. "Why, it's just the bank of the stream!"

"Lock," Hammond answered. All along the creek were evidences of labor. Here and there, disregarding the high water, men labored at the shoveling of earth into long, wooden sluice boxes which, picking up the water from a flume running from a higher point in the stream, carried it down on a slow decline.

"You just wash it through and it becomes gold?" Kay said curiously.

"Isn't that cute?"

"It looks like a day laborer's job to me," her mother reflected.

A shout answered her, from upstream, where the raw-boned Olson and two partners were working. Instantly labor stopped elsewhere. Necks craned. Heads appeared above the higher portions of earth, where the stream temporarily ran between cut banks. Then men began to converge upon the sluice box.

"Let's go up," Hammond exclaimed. "Olson's found something in the clean-up."

"The clean-up?" Kay asked, hurrying beside him. Mrs. Joyce following somewhat in their wake, glancing aerily about her, a woman who seldom smiled, who seldom gave interest, yet who seemed always to be weighing everything within her range. Hammond turned to explain.

"Yes, the clean-up. You see, those long wooden chutes are called sluice boxes. They've got cleats across the bottom, called riffles. The dirt is shoveled in at the top and is carried along by the water. The dirt and light gravel flow on out. Anything heavier settles behind those riffles."

"Oh, I see. Then you stop shoveling and pick up the gold."

"Not that easy. It takes a long time for those riffles to fill up. Then everything they've caught is scraped out. After that the miners pan it."

"Pan it?"

"Yes—there's one." He pointed to a discarded gold pan on the creek's bank, flat bottomed and with sharply sloping sides. "They put the scrapings in there and drip water into it, swishing it around. It takes a long

NERVOUS?

Why not try LYDIA E. PINKHAM'S VEGETABLE COMPOUND?

time to get rid of everything but the nuggets."

"Oh, I'd love to see a nugget again. Like those you gave me in Seattle."

Hammond laughed.

"It looks like you'll get your wish, Olson's pretty excited."

(To Be Continued)

Nothing Wrong With It

"Purge" Still Is Considered A Perfectly Good Word

A woman in New York writes to her favorite newspaper to say that she doesn't like the word "purge".

She wonders why so many political writers in this country have "avidly seized upon it" and show a liking for "verbal expressions of a nation whose ideals and institutions are so at variance with ours."

Apparently she thinks that "purge" comes out of Germany or the Soviet Union or China, where the thing it stands for is known, but the word itself is not.

The ancient Roman used the verb "purgare" or "to make pure."

The French took it up and passed it on to the English.

Shakespeare and the King James Bible refer to "purges" and "purgings."

The first use of the word in its present political sense appears to have been in connection with "Pride's Purge".

Gen. Thomas Pride was deputed by Cromwell in 1648 to "purge" the British House of Commons by ejecting from it all members who refused to vote as Cromwell wished them to.

With that distinguished pedigree behind it, why should anyone in this country object to the adoption of this very pat and pungent word into the American political vocabulary?—Detroit Free Press.

A Changing Shore Line

Launching Of Big Ships Keeps Banks Of Clyde Moving

If any one thinks for a moment that he or she can escape the new ships which are coming out, they just haven't been about where the mimo-graph smoke blows the meanest. Of all the tales we like, particularly, the one of the new Queen Elizabeth, states Robert Wilder, in the New York Sun.

Built on the Clyde, a narrow stream, if ever, and launched into water which is a full 200 feet narrower than the ship itself, the John Brown shipyards are forced to blast out the additional feet from the opposite bank to allow her stern to sink in and the ship herself to be turned around. This would be routine enough, save for the fact that the same thing had to be done for the Queen Mary. The banks, however, fill in. Cunard continues to build ships. The result is there is a fine time on the opposite banks, what with blasting and all and the natives never quite knowing where the shore line is to be the next morning.

At the moment, we understand, they are holding their collective breath and wondering when, if ever, they will be allowed to pursue their heretofore peaceful ways and perhaps catch a fish or two before Cunard is up and at them again.

Request Market Survey

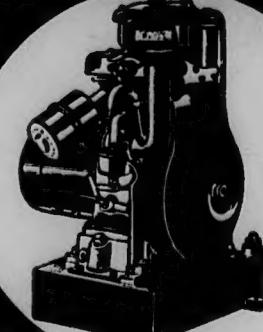

Prairie Provinces Ask Investigation Of Canada's Live Stock Industry

A complete investigation of Canada's live stock industry was asked in a motion passed by a conference attended by representatives of the three Prairie Provinces held recently at Regina. The resolution, moved by Hon. D. L. Campbell, Minister of Agriculture for Manitoba, and seconded by Hon. D. B. Mullen, Minister of Agriculture for Alberta, was passed with the objective of obtaining greater stability for the Canadian live stock industry through eliminating extreme price fluctuations and transportation and production difficulties.

The conference, sponsored by a committee set up by the Manitoba Legislature last winter, was one phase of the work being done by that committee. Already marketing methods in both St. Paul and Minneapolis have been studied. Dr. J. A. Munn, M.L.A. for Dufferin, is chairman.

Man has learned more about the earth on which he lives by studying the stars than by studying the earth itself.

COMFORT! CONVENIENCE! SAFETY! with a JOHNSON CHORE HORSE

Brilliant Electric Light Constant Dependable Power

NOW! at low cost (as low as \$69.50), with a new Johnson Chore-Horse, enjoy the comfort and convenience of electric light and power at the touch of a button. Flood your home, buildings, and yard with brilliant electric light and generate ample power for the hundred and one conveniences you have always wanted, such as radio, charging batteries, water pumping, vacuum cleaner, washing machine, electric iron, milker, etc. Wherever you live, regardless of location, wind and weather a Johnson Chore-Horse will modernize your home with electricity and at a cost easily within reach of every rural home. No installation trouble—positive operation—always ready for use—designed for long life. Chore-Horse models are available in a full range of capacity from 150 to 800 watts and include engineering advancement exclusive to Johnson. Precision-built manufacturing guarantees trouble-free operation, while sturdy construction insures years of satisfactory service under severest conditions. Whether your particular requirements call for the smaller six volt units or for the super-power 800 watt 32 volt model, you'll find a Johnson Chore-Horse, modestly priced, that will serve your requirements best. Write today for free folder and complete information, and investigate, fully, every advantage offered by the Johnson Chore-Horse.

The J. R. WATKINS Co.
Dept. RS12 Winnipeg, Man.

Extra good value in men's winter underwear.—Buy it at Scott's.

The East Likes Western Poultry to the Tune of Nearly \$2,000,000 a year

Not only do Western hens lay for the East to the extent of over 50,000,000 eggs a year, but over 6,000,000 lbs. of them, and their consorts, go East in person to grace the dining tables of Eastern industrial workers.

The East needs the West to feed it. The West needs the East as a market for its produce; so the two work together—the East by spending over \$40,000,000 a year with the Western farmer, and the West—by buying Canadian-built cars.

And that's a point worth remembering, for every car bought in the West helps not only the food-consuming automobile worker—it keeps men working and on payrolls in the rubber, paint, glass, steel, parts, chemicals and many other Eastern industries, to the ultimate advantage of the Westerner himself.

For statistical and further information about this industry, write to
Automotive Industries, 1006 Lumsden Building, Toronto.
